

Advanced Dealer Systems

The Cutting Edge of Automotive Internet Marketing & Technology

At Advanced Dealer Systems, we provide automobile dealers the ultimate in interactive client follow-up systems, aggressive lead generation tools, stimulating dealer web sites and aggressive internet marketing strategies. Our premium marketing programs are specifically tailored for automotive dealerships to generate hundreds of new leads every month. We will maximize your online exposure, implement our intensive short and long-term interactive follow-up strategy, and substantially increase your sales.

The internet is the number one tool used by consumers to research and educate themselves about the car they will buy and the dealership they will buy from. A dealership's web structure and procedures are required to perform many duties. It has to educate, inform, and must streamline the process of the sale. You will benefit by presenting a website and a follow-up system consisting of integrated tools that provide the client with the knowledge and information they need. You can now capture valuable lead information to effectively convert an internet "surfer" into a buyer.

Your Competitor's Have No Place to Run And No Place to Hide ...

... And we wouldn't want it any other way.

At Advanced Dealer Systems we implement aggressive Counter Intelligence strategies combined with overwhelming search engine domination for all our dealers. We aggressively target our clients' competitors online, infiltrating their PPC (pay per click) campaigns on Google and Yahoo, while overtaking and using their own search terms and keywords against them. To compete for search engine traffic, it is essential to know the search terms your competitors are using, how effective they are and what search terms they are successful with. We are able to spider and spy on any website in the world. We will camp in your competitor's websites, identify the links and campaigns that are responsible for generating the most traffic to their websites, and with this information, we can target and disrupt most of your competitor's online efforts.

We are your personal internet mercenaries. Our internet team and our search engine/ website spiders work day and night gathering information on your competitors, and we use this information to dominate your competitors online.

They will have no place to run, no place to hide. In fact, they will not even know they have been targeted. This will give your dealership and website an unfair advantage to collect and horde the valuable clients we know shop and do research online.

Advanced Dealer Systems brings over 75 years of automotive experience. We are not a team of geeks, we are a team of seasoned automotive veterans. We have been raised in the trenches. We know what information is valuable to our clients and we know exactly what car dealers need in today's challenging times.

Give Advanced Dealer Systems a call before your competition decides to.

Follow Up E-Mail Templates

Precision Guided Interactive Follow-Up System

- Complete online digital marketing system
- Keep customers in your infrastructure longer
- Long-term automated and manual follow-up
- Stick out from the crowd and your competition
- Converts past leads in to new "ups"
- Never forget to follow-up a client again
- Clients can shop your dealership 24/7
- Printable digital brochures
- Total lead management and control
- Convert "web clients" to "sold clients"

Internet Lead Follow-Up

A comprehensive library of 30+ custom follow up E-mails. designed to interact. educate. and stimulate communication with your online clients. Our step by step process of follow-up. allows your salespeople to track, contact, communicate. and stay in control of your online clients. Your salespeople now have a pre-designed interactive "road map" to setting the appointment and guiding clients to the showroom, and then making the sale.

Showroom Integration & Follow-Up

Integrate your showroom traffic to the ADS Follow up system and use the same interactive follow-up library of E-mails that we use on the internet. If you don't close them on first visit- no problem; send a "thank you for visiting" E-mail to their E-mail box before they get home. and then contact and interact with clients after they leave your showroom. Never lose track of a "walk-in" customer again. Permanently add your "walk in" clients to the system. and then follow up, track, interact. and market to them any time you wish.

Interactive Online Marketing

This is where it gets fun! Once a client has entered the system we are able to contact and inform clients at any time about anything. All ADSE-mails are custom designed with our patented "BILLBOARD" built in. This "BILL BOARD" can change and display any message that is desired, for real-time and on demand marketing campaigns. We can even change the message within the "BILL BOARD" on E-mails sent months ago.

Service & Parts Integration

Sold clients now become Service clients, and the transition is seamless. Automatically remind clients of oil changes. required maintenance. tire rotations. etc. Instantly send out coupons, discounts. or incentives to attract service and parts business. Maintain, interact and track your clients through the entire ownership process. Merge the entire dealership into an interactive follow-up system designed to collect, contact and maintain your current and future clients.

Search Engine Marketing & Optimization

SEM Strategies

Over 87% of car buyers use the Internet during their car buying process. Whether they perform general research on different cars or are deciding which dealer they wish to visit, dealership exposure to these consumers is the difference between making a sale or not. With such a high percentage of people using search engines to find dealerships and to do vehicle research, our goal is to direct this audience to your dealership's web structure. Advanced Dealer Systems' Search Engine Marketing team is dedicated to making sure that your dealership gets high-quality traffic from a local level directly from the search engines. Industry research shows that these visitors produce the largest number of quality leads for your internet department to target. All of our marketing efforts apply to the largest search engines in the world, including Google, Yahoo and MSN.

Overwhelming Search Engine Positioning & Ranking

We implement Guerilla Marketing and Counter Intelligence Tactics with our Pay per Click (PPC) advertising campaigns on Google and Yahoo. We aggressively target our clients' competitors online by over taking popular search terms and keywords on a local dealer territory level, while also simultaneously using a well crafted Micro-Site strategy to overwhelm the competition within these search engines. You will be positioned to horde and collect the valuable clients using the search engines. Our pay per click marketing plans work hand in hand with traditional search engine optimization to provide the best results at the lowest cost to our dealers.

Advertising campaigns on Google and Yahoo. We aggressively target our clients' competitors online by over taking popular search terms and keywords on a local dealer territory level, while also simultaneously using a well crafted Micro-Site strategy to overwhelm the competition within these search engines. You will be positioned to horde and collect the valuable clients using the search engines. Our pay per click marketing plans work hand in hand with traditional search engine optimization to provide the best results at the lowest cost to our dealers.

Spider-Bot Compatibility

Every month, an electronic Spider-Bot crawls the web, accessing your website. These spiders gather information to take back to Google, Yahoo, MSN, AOL, and others. The search engines use this information to prioritize and index your site, depending on what they find. Unfortunately, most sites are not designed or set up correctly for proper indexing and, in many cases, are not indexed at all. We know how these spiders think and we make sure your dealership speaks the proper language to get you indexed at the top.

Spider Magnet

All spiders are driven by content. Our system is equipped with a content and keyword integration tool that draws in the industry terminology, news, and information for strategic placement on and off your website. Our experts strategically place this information for optimum indexing and prioritization. The end result is top placements in organic (SEa) listings.

Direct Inventory Broadcasting

We are qualified as a Google AdWords Company and a Yahoo Ambassador. We send your inventory directly to Google and Yahoo so your inventory is indexed immediately, allowing people to find you first.

Advanced Dealer Systems will not engage in cloak and dagger methods to learn critical information about your competitors. There are plenty of legitimate ways to gather vital information on your competitors without resorting to illegal methods. We will also be relentless at collecting new information as it becomes available about your targeted dealers online activities. Every business must keep their eyes on their competition, and your competitors know this as well. One thing is for sure, whether you know it or not- Your competitor is checking you out! It's just the nature of good business.

Internet Lead Generation

Advanced Dealer Systems knows what it takes to generate results from our leads

Micro-sites are an aggressive way to generate in-house leads for your dealership and expand your existing online advertising. ADS Micro-sites can be planted throughout the search engines where potential clients shop or do research on new or pre-owned vehicles. When a customer begins searching for a vehicle, they will find your numerous ADS Microsites nearly everywhere they search online. ADS Micro-sites offer clients assistance, information or provide a service while they are actively searching for a vehicle. ADS Microsites are designed to collect real time client information and then convert this information to an active lead, which is then immediately delivered to your internet department.

New/ Used Car Quote Sites

Our car quote program offers dealerships the opportunity to work with customers that are looking for a new vehicle in their immediate area. Customers submit a price request via the internet, and within minutes the request is filtered and delivered to the appropriate dealership. Our customers come to us through a multitude of internet marketing, web partners, and multi dealership inventory portals.

Special Finance Leads

For credit challenged automotive customers who need to obtain financing and purchase a vehicle. We advertise through the internet on our vast array of web sites. as well as with over 1100 affiliate partner web sites. Once the customer locates us on-line, they fill out a complete credit application, which in turn is immediately directed to you the dealer as an opportunity to do business with that customer.

Invalid Leads

Advanced Dealer Systems takes great care in making sure that all information that is passed through our system is accurate and valid. Because of this regard for top quality service, Advanced Dealer Systems has created an Invalid Lead Policy. This policy assures that Advanced Dealer Systems will strive to maintain a high level of commitment in providing quality services for its Car Buying Customers and Dealer Partners.

Dealership Training

Advanced Dealer Systems has found that training and support are important elements in creating a successful business environment. Every Dealership is given the same attention to training and support necessary to fulfill the needs of our car-buying customers. This attention equates to increased sales and increased profits. This is not just a partnership this is a commitment. Truly the bottom line is selling cars.

Micro-Sites

Organic Lead Generation

Micro-Sites are an aggressive way to generate in-house leads for your dealership and expand your existing online advertising. ADS Micro-sites can be planted throughout the search engines where potential clients shop or do research on new or pre-owned vehicles. When a customer begins searching for a vehicle, they will find your numerous ADS Microsites nearly everywhere they search online. ADS Micro-sites offer clients assistance, information or provide a service while they are actively searching for a vehicle. ADS Microsites are designed to collect real time client information and then convert this information to an active lead, which is then immediately delivered to your internet department.

Aggressively Generate Your Own Leads

ADS Micro-Sites target customers while they are shopping or researching vehicles online. Micro-Sites will drive more targeted traffic and leads to your website and CRM Tool. These sites are typically made up of 1 to 5 pages and can be promoted independently through traditional media and search engines. Micro-Sites give more vehicle specific information, or are built with a targeted market in mind, therefore obtaining higher organic rankings under that subject or theme on the search engines. Micro-Sites mix about the search engines giving the client an impression the site was designed for what they happen to be researching at that time.

Custom Dealer Branded Websites

Don't Wait for Traffic Consistently Reel Them In

Rich media has become the dominant force in website design and development. We implement this for immediate and positive impressions of your website. Your website will also be optimized for search results on Google, Yahoo, and MSN; putting you in front of 94% of search engine traffic. Aggressive optimization will connect you to more potential clients because you are simply easy to find. We will assist you with getting your dealership and inventory with the strongest and most powerful web partners available. We will make it near impossible NOT to find you. Your competitors will be swamped by your search engine domination. Unique custom and expert website design will incorporate your dealerships unique image and brand by implementing our high end graphics, video, animation, and comprehensive follow-up into the strongest web presence in your market.

New Car Showcase

Don't send your customers away to the manufacturer to do research. That's like having a sign in your parking lot sending them down the street to check out another dealership's inventory. With our data partners Chrome, Evox, and Auto data we can provide features, technical specifications, 3d-spins, video, etc. for research purposes.

Virtual Notification System

A fully automated 24/7/365 vehicle, ads, events, incentives, coupons, and specials notification system.

Build Your Car, Make An Offer

Since we have partnerships with Chrome, Evox and Auto data we can provide your customers the ability to build a car, compare vehicles side-by-side, choose options, colors, etc and then search inventory, ask questions, or make an offer on the vehicle they built.

Spider-Bot Compatibility

Every month an electronic Spider-Bot crawls the web accessing your website. These Spiders gather information to take back to Google, Yahoo, MSN, AOL, and others. We know how these spiders think and we make sure your dealership speaks the proper language to get you indexed at the top.

Coupon/Ad Creation System

"Go Digital" is our motto, and with our Coupon/Ad creation tool, you can create powerful graphic messages and offerings to your customers without having to know HTML. By Digitizing your offerings, you open up the door for automation and distribution.

Dealer Micro-sites

AGGRESSIVELY GENERATE YOUR OWN LEADS

Microsites are an aggressive way to generate in-house leads for your dealership and expand your existing online advertising. ADS Micro-sites can be planted throughout the search engines where potential clients shop or do research on new or pre-owned vehicles. When a customer begins searching for a vehicle, they will find your numerous ADS Micro-sites nearly everywhere they search online. ADS Micro-sites offer clients assistance, information or provide a service while they are actively searching for a vehicle. ADS Micro-sites are designed to collect real time client information and then convert this information to an active lead, which is then immediately delivered to your internet department.

ADS Micro-Sites target customers while they are shopping or researching vehicles online. Microsites will drive more targeted traffic and leads to your website and CRM Tool. These sites are typically made up of 1 to 5 pages and can be promoted independently through traditional media and search engines. Microsites give more vehicle specific information, or are built with a targeted market in mind, therefore obtaining higher organic rankings under that subject or theme on the search engines. Microsites mix about the search engines giving the client an impression the site was designed for what they happen to be researching at that time.

Let Me Know What I Can Do to Help

%FIRSTNAME%,

Hello! It's been quite a while since we last saw you at % DEALERSHIP%. We just want to remind you that we're here and ready to serve you with any, and all, of your automotive needs.

If it's time to finally make that car or truck purchase you've been planning on, we are well stocked with a full line-up of several luxury makes and models. As always, our everyday low competitive prices make an excellent value even better.

Mostly, we just wanted to assure you, again, that everyone at %DEALERSHIP% is totally committed to your complete satisfaction. For sales and financing, we want to be your dealer

for years to come.

Drop in and see me personally sometime soon. All I ask is that before you buy anywhere else, please let us talk with you one more time. We pride ourselves on very competitive pricing, and we can beat anyone else's deal.

I hope to see you soon.
